I've managed to transform a DFA to an NFA, but I cannot find a way to do the inverse. Here's my code: public class QV { public static void main(String[] args) { Scanner input = new Scanner(System.in); String message = input.nextLine(); message = removeWhiteSpaces(message); String[] words = message.split("\\s+"); String x; for (String word : words) { if (word.equals("start")) { x = word; break; } else if (word.equals("end")) { x = "start";
