Transmitters are used in a number of applications to transmit data from a transmitter to a receiver. In some applications, signals used to transmit data are encoded by a signal encoder to make the data non-repeatable in a post-encoding operation with a repeatable result when the data is in a pre-encoding operation. An example of this is that of an indicator lamp for vehicles, where an indicator lamp is activated at a pre-encoding operation to indicate the pre-encoding operation has been successfully completed, and only the non-repeatable data is transmitted. When the operation has completed, the vehicle can be signaled to continue normal operation. In some applications, the transmitter will provide a signal for a receiver which is separate from an encoder. For instance, in some applications a transmitter will transmit data for a receiver, without encoder. This can be done, for example, to support a system where the transmitter is used with types of receivers that do not have the capability to encode data. In some instances, the transmitter will include both a signal encoder and a separate transmitter channel for signal transmission. For instance, in some data transmissions, an encoder will transmit data such as coding information, and at the same time transmit a separate transmitter channel for transmission of transmission data. The transmission data is provided from a data source such as a sensor, for example, a pressure sensor. In this instance, it may be sufficient for the encoder to transmit information based on the data source to ensure the

◆ 1. INTRODUCTION At the dawn of the 21st century, an incomprehensible cataclysm called “The Great Cataclysm” struck and depopulated most of the world. This cataclysm was a great disaster, and its consequences were infinite. Most of the people who survived were scattered among the lands of the Lands Between — a vast world full of peculiar creatures and dangers. Many of them have lived for hundreds of years since the great cataclysm. However, some of them remained alive. They called themselves “the people of the darkness” — or “the Tarnished” for short. As the Tarnished, you will trace the course of the cataclysm and create your own character for the Elden Ring game.

◆ 2. GAMEPLAY The Elden Ring game is set on a vast world full of diverse and exciting environments that interact with each other. As the Elden Ring, your battle challenge is to conquer the land, sky, and sea. In addition, you must safeguard the treasure chests that are scattered across the land, which contain various items — but you cannot take them all. When you win battles, you can also bid on items at the auction that is held every night in the form of a competition. The items you bid for or that you win are added to your inventory. With any item you’ve collected, you can utilize the actions of the various items in a variety of ways. For example, items like a shovel can dig for treasure or raise sunken ships to the surface, and items like bombs can destroy enemy creatures. Even items that seem useless can be used to your advantage in certain situations.
